SPECIFICATIONS

Audio power specifications

POWER OUTPUT AND TOTAL HARMONIC DISTORTION:

With 4 ohm loads, both channels driven, from 20 – 20,000 Hz; rated 270 watts per channel minimum RMS power, with no more than 0.006% total harmonic distortion from 250 milliwatts to rated output.

With 8 ohm loads, both channels driven, from 20 – 20,000 Hz; rated 200 watts per channel minimum RMS power, with no more than 0.004% total harmonic distortion from 250 milliwatts to rated output.

Other specifications

Item	Condition	Data
Continuous RMS power output (both channels driven simultaneously)	4 ohms 20 Hz – 20 kHz THD 0.006%	270 W + 270 W
	6 ohms 20 Hz – 20 kHz THD 0.005%	230 W + 230 W
	8 ohms 20 Hz – 20 kHz THD 0.004%	200 W + 200 W

Dynamic power	1 ohm	660 W
	2 ohms	800 W
	4 ohms	520 W
	6 ohms	370 W
	8 ohms	300 W
Power bandwidth (IHF)	4 ohms, 0.02%	10 Hz – 100 kHz
	8 ohms, THD 0.02%	10 Hz – 100 kHz
Dynamic headroom ('78 IHF)	4 ohms	2.8 dB
	8 ohms	1.8 dB
Total harmonic distortion	4 ohms, at 10 watt output	0.004%
	6 ohms, at 10 watt output	0.003%
	8 ohms, at 10 watt output	0.0018%

SAFETY CHECK-OUT

After correcting the original service problem, perform the following safety check before releasing the set to the customer:

Check the antenna terminals, metal trim, "metallized" knobs, screws, and all other exposed metal parts for AC leakage. Check leakage as described below.

LEAKAGE TEST

The AC leakage from any exposed metal part to earth ground and from all exposed metal parts to any exposed metal part having a return to chassis, must not exceed 0.5 mA (500 microamperes). Leakage current can be measured by any one of three methods.

1. A commercial leakage tester, such as the Simpson 229 or RCA WT-540A. Follow the manufacturers' instructions to use these instruments.
2. A battery-operated AC milliammeter. The Data Precision 245 digital multimeter is suitable for this job.

Features**Super legato linear system**

This unit employs super legato linear system which drives low impedance speakers and assures powerful reproduction without low crossover distortion and switching distortion over the wide range.

Spontaneous twin drive power supply circuit

Condensers having large capacity are used for the voltage amplification drive stage of class A and power output stage of class B. Thus, a stable output and high quality sound are obtained, resulting in exclusion of power interferences. The class A stage realizes a stable operation free from interference of the power stage even when an instantaneous or strong output is received.

G chassis

A one-piece, hard chassis, named "Gibraltar", reduces distortion caused by vibrations. This reduces air vibrations from the floor and speakers and also reduces vibrations caused by the power transformer and power transistors.

3. Measuring the voltage drop across a resistor by means of a VOM or battery-operated AC voltmeter. The "limit" indication is 0.75 V, so analog meters must have an accurate low-voltage scale. The Simpson 250 and Sanwa SH-63Trd are examples of a passive VOM that is suitable. Nearly all battery operated digital multimeters that have a 2V AC range are suitable. (See Fig. A)

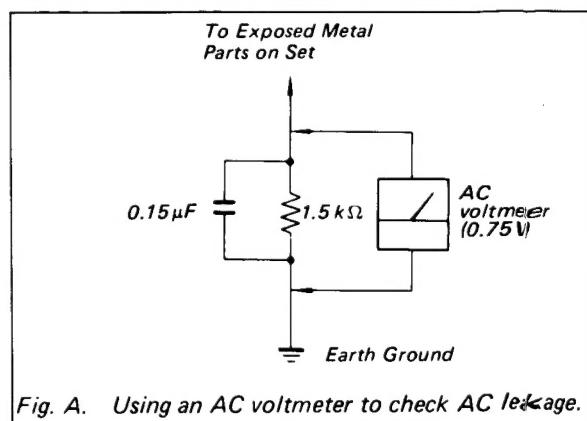

Fig. A. Using an AC voltmeter to check AC leakage.

System connections

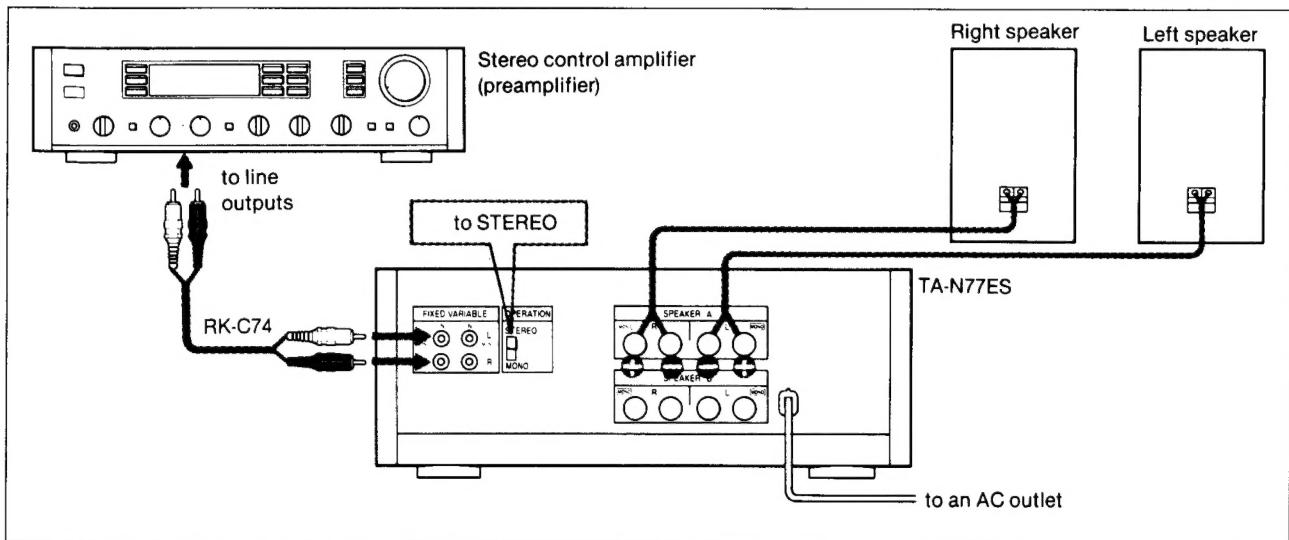

Preamplifier connection

The unit provides two kinds of input jacks, FIXED and VARIABLE, which can be switched by means of the INPUT selector located on the front panel.

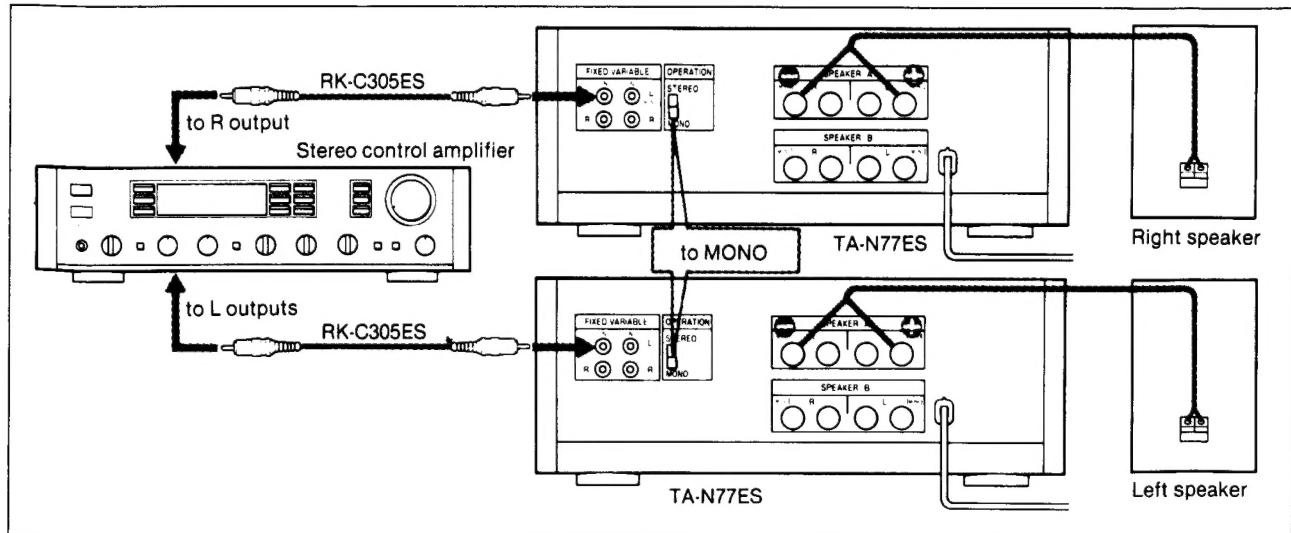

FIXED input jacks: Normally connect a preamplifier to these jacks. When these jacks are used, the sound level is controlled by the attenuator on the connected preamplifier.

VARIABLE input jacks: A CD player, etc., can be directly connected to these jacks to enjoy the digital sound. In this case, the LEFT and RIGHT ATTENUATORS on the front panel control the sound level.

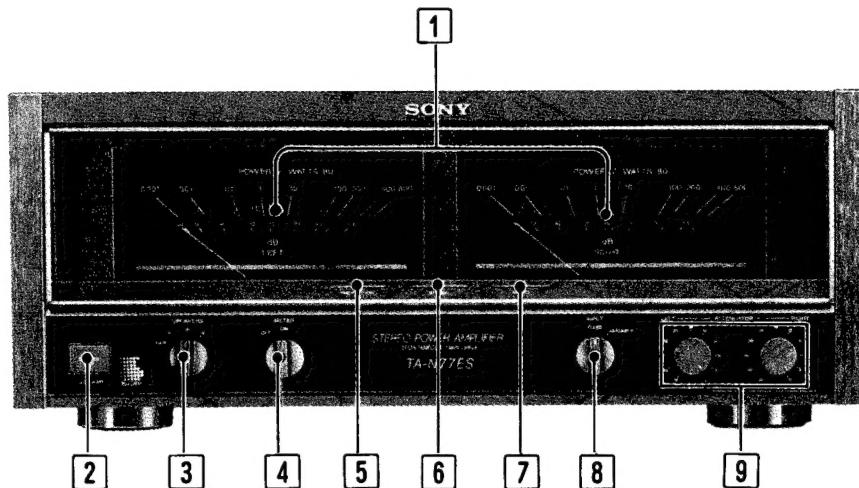

Connection as a stereo power amplifier

Connection as a monaural power amplifier

Function of controls

1 Left and right meters

When a speaker system having a nominal impedance of 4 ohms is used, the needles of the meters oscillate twice as when 8-ohm speakers are used.

2 POWER switch

3 SPEAKERS selector

Selects speaker system A or B, or both.
For headphone monitoring on the connected preamplifier, set to OFF.

4 METER switch

Switches meter deflection on or off.

5 PROTECTION indicator

Lights up for approx. 8 seconds immediately after turning on the unit. This indicates that the built-in muting circuit is activated.
In normal operating conditions, this does not light. If it lights up (speaker sound is not heard) while operating, an abnormality has occurred. In this case, disconnect the AC power cord and check the connected components and speaker systems.

6 STEREO indicator

Lights up when OPERATION is set to STEREO and a stereo program is played.

7 MONO indicator

Lights up when OPERATION is set to MONO and a monaural program is played.

8 INPUT selector

Selects input source connected to the input jacks on the rear panel; FIXED or VARIABLE.

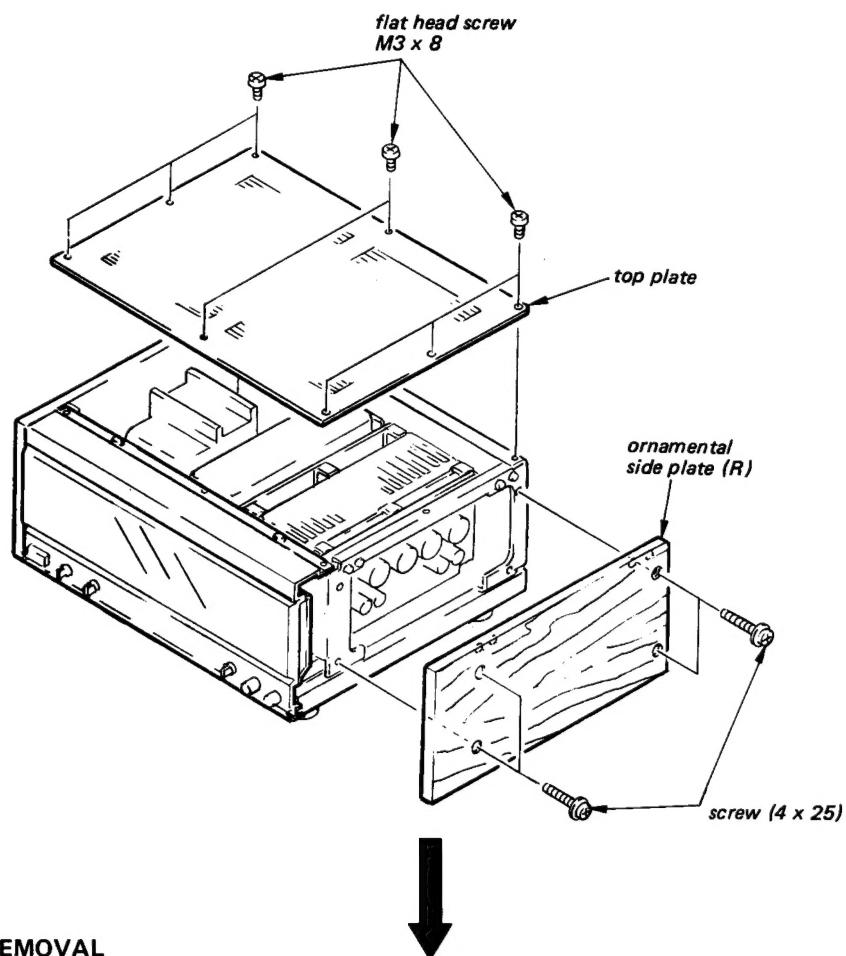

9 ATTENUATORS and indicator

Control input signal sound level from the preamplifier connected to the VARIABLE input jacks. The indicator lights up to indicate that the ATTENUATORS are activated.

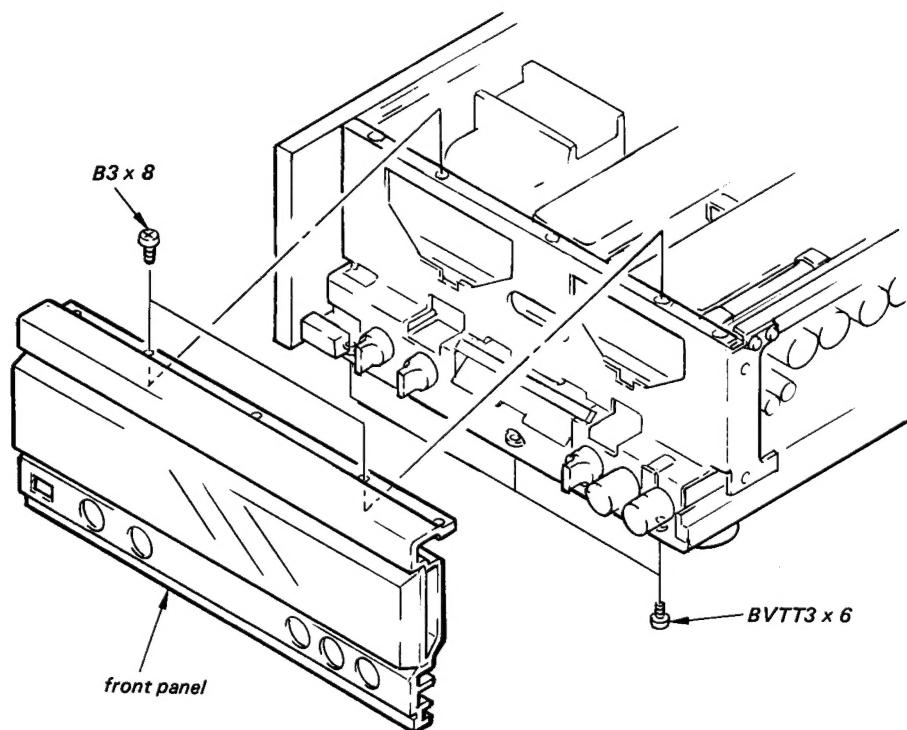

SECTION 1 DISASSEMBLY

Note: Follow the disassembly procedure in the numerical order given.

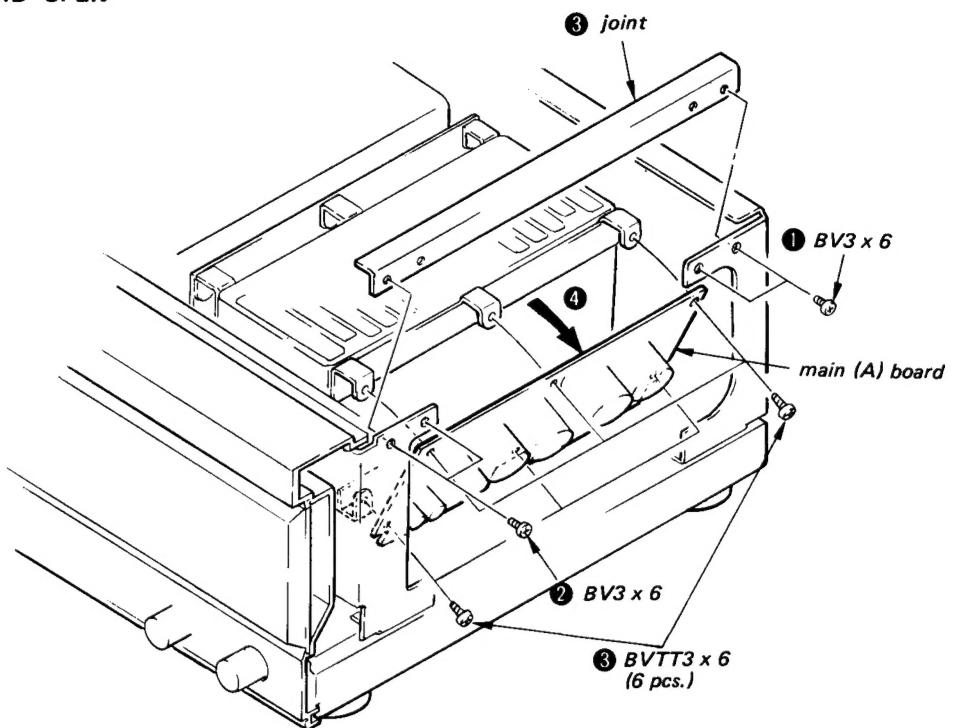

TOP PLATE AND ORNAMENTAL SIDE PLATE (R) REMOVAL

FRONT PANEL REMOVAL

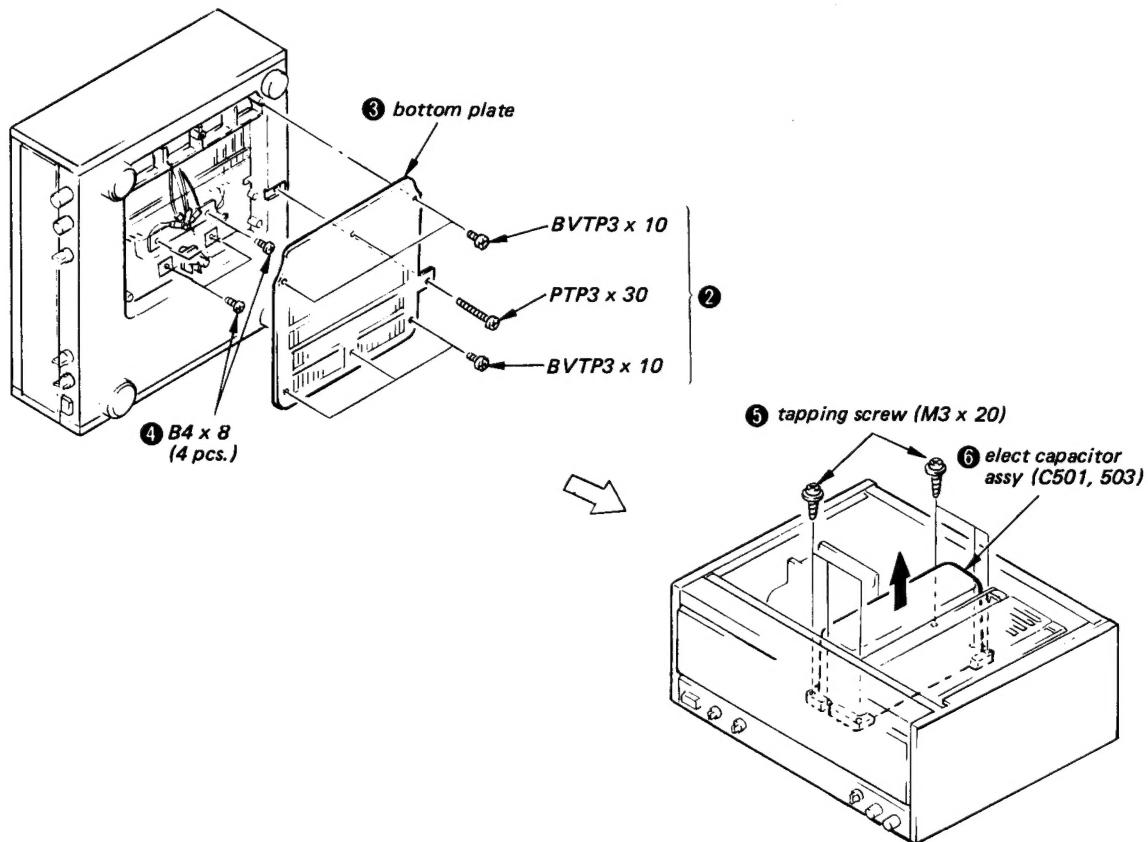

MAIN (A) BOARD OPEN

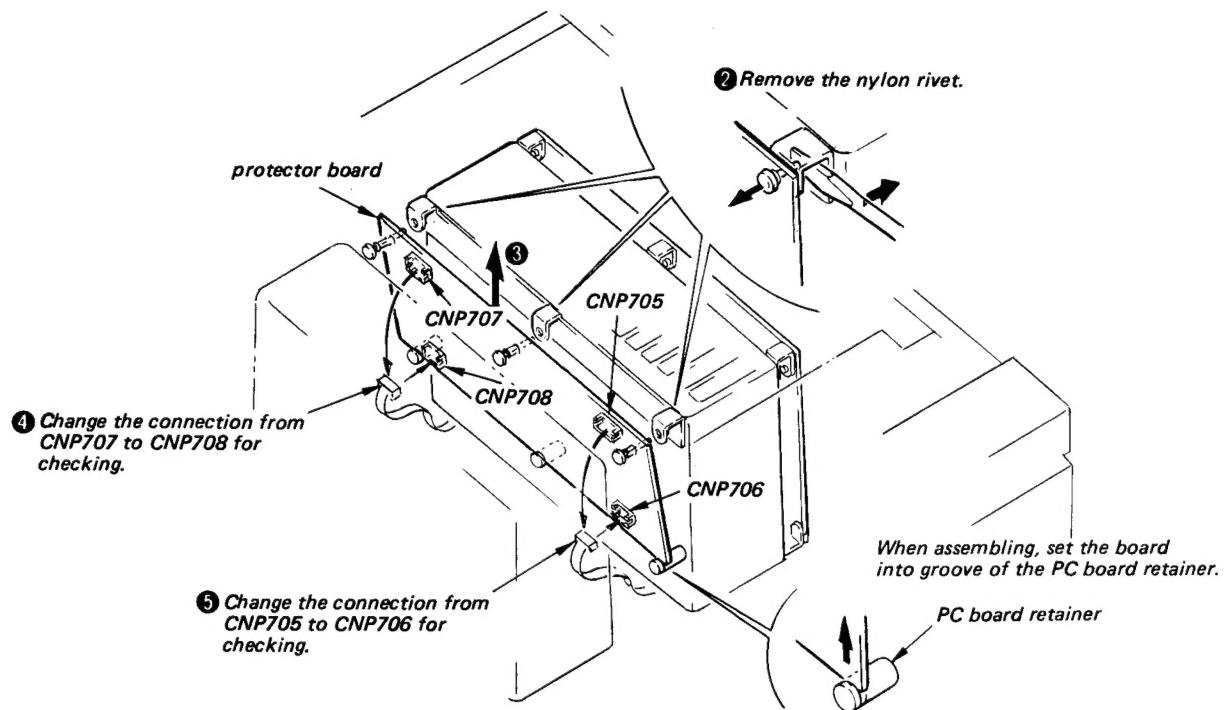

ELECT CAPACITOR ASSY (C501, 503) REMOVAL

- ① Remove the top plate (See page 6.).

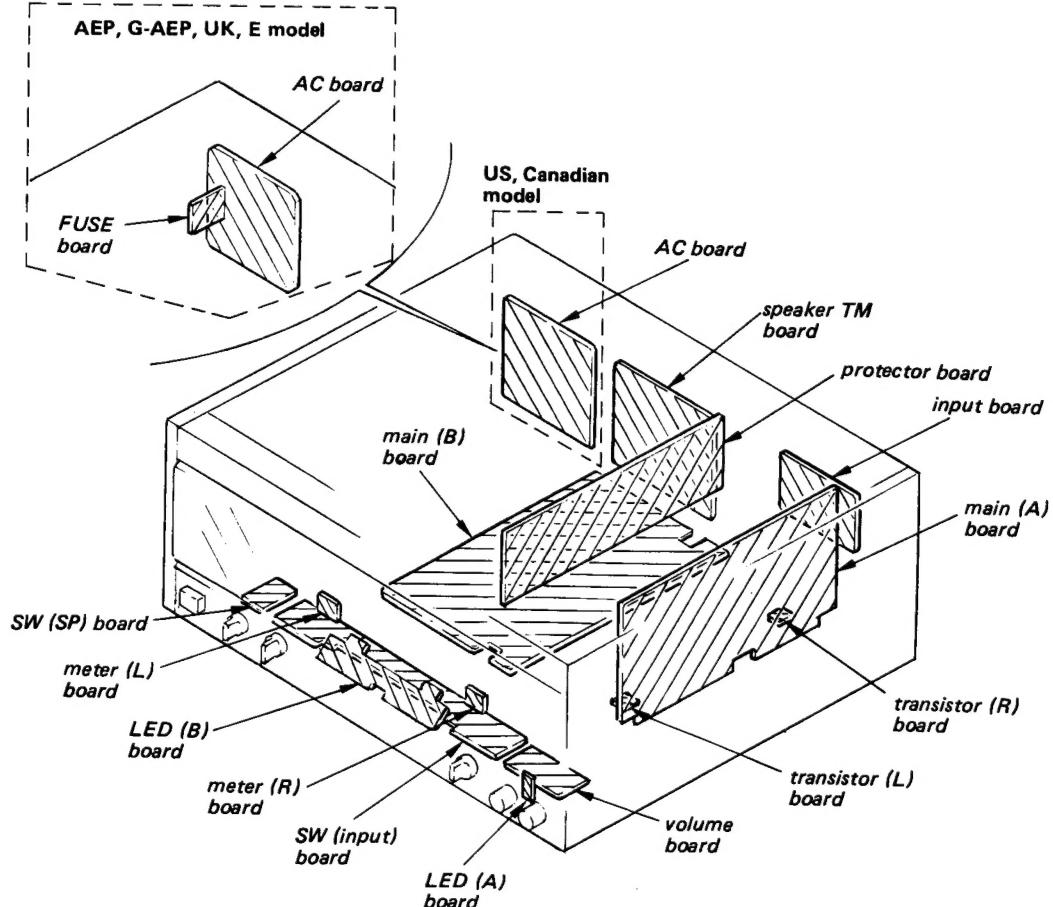

PROTECTOR BOARD REMOVAL

① Remove the top plate (See page 6.).

CIRCUIT BOARDS LOCATION

SECTION 2

ELECTRICAL ADJUSTMENTS

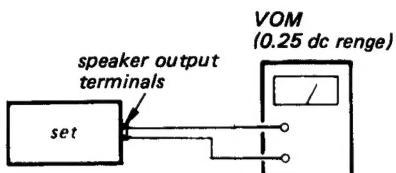

Note: Adjustment should be performed 5 minutes later, after the power switch is on.

Offset Adjustment

Setting:

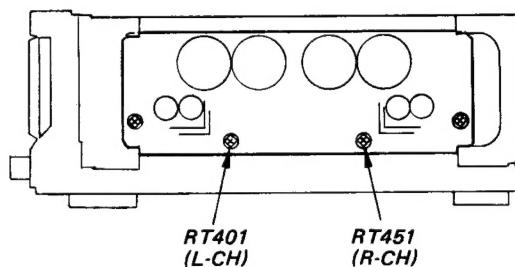

OPERATION switch: STEREO
Input signal: No signal input

Procedure:

Adjust RT401 (L-CH) and RT-451 (R-CH) for 0 V reading on the VOM.

Adjustment Location: main (A) board

Bias Current Adjustment

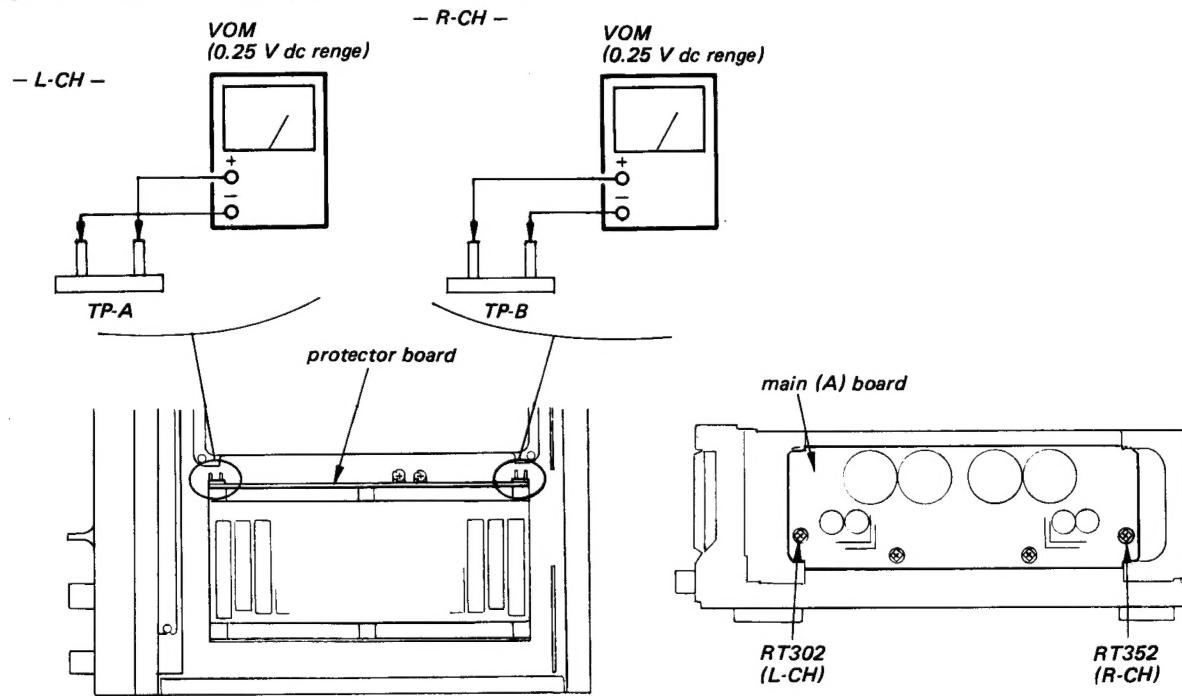

Setting:

OPERATION switch: STEREO
Input signal: No signal input

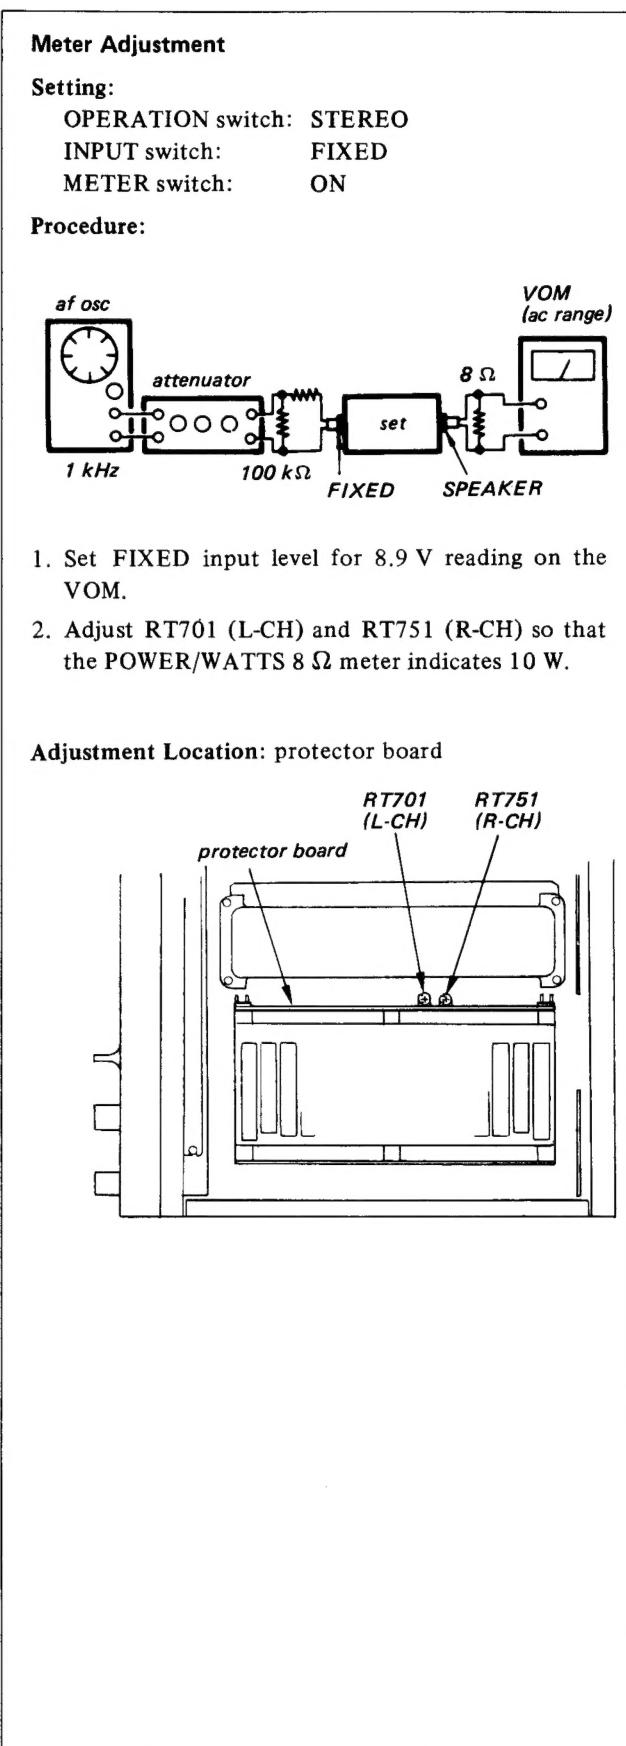

Procedure:

Adjust RT302 (L-CH) and RT352 (R-CH) so that VOM readings of TP-A (L-CH), TP-B (R-CH) become 15 mV.

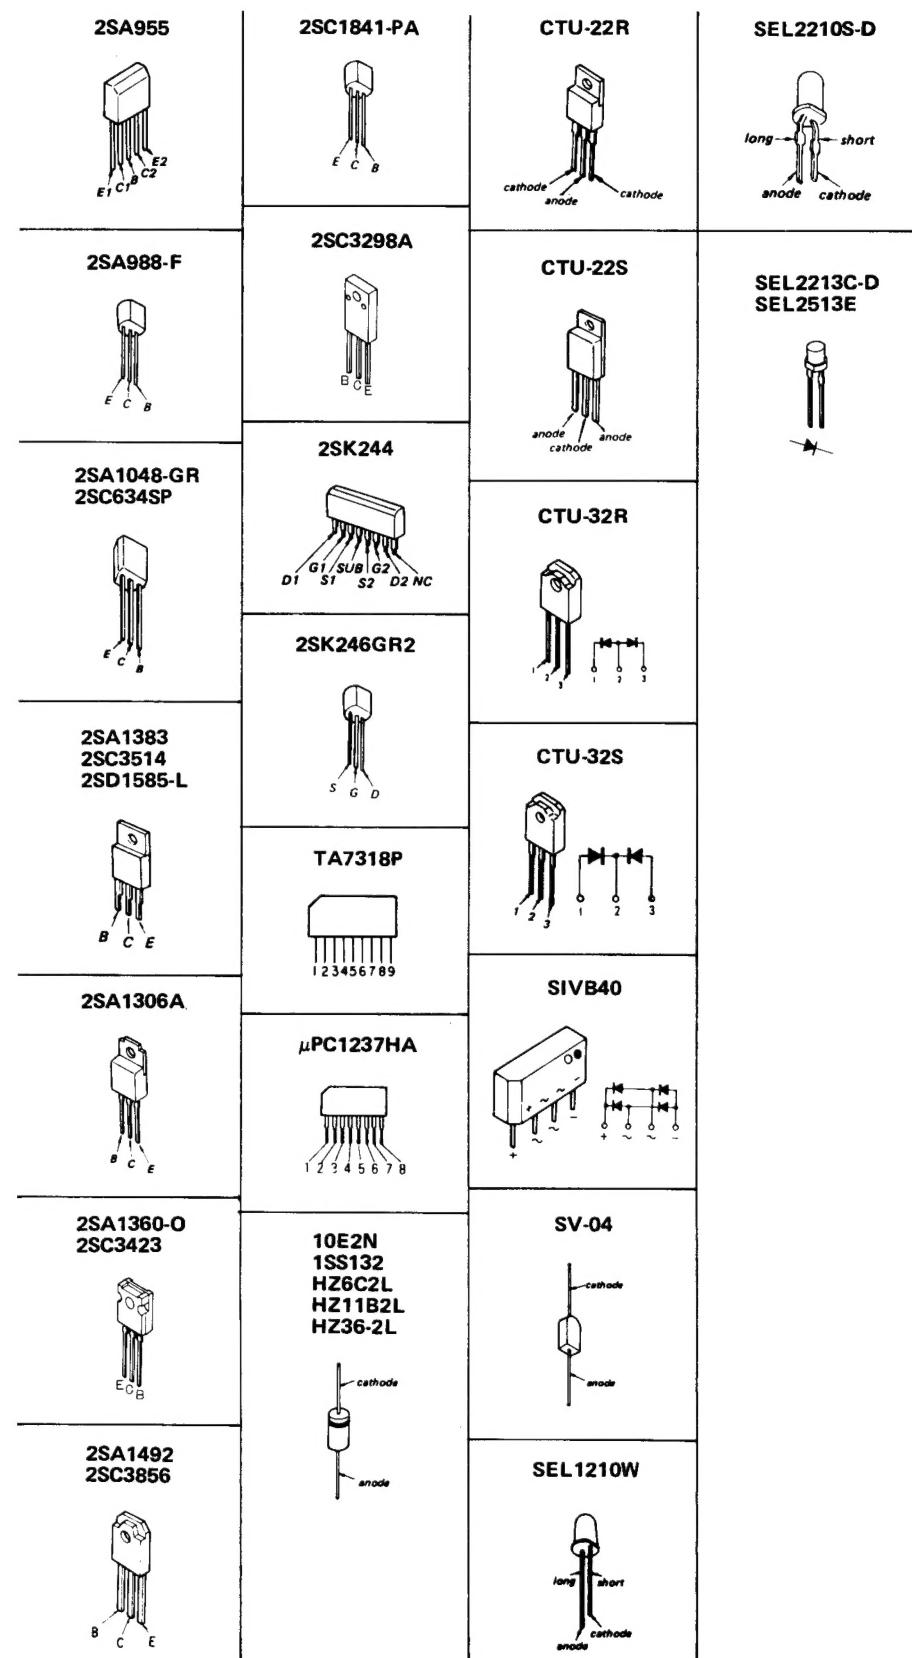

Adjustment Location: main (A) board and protector board

SECTION 3 DIAGRAMS

SECTION 4

EXPLODED VIEWS AND PARTS LIST

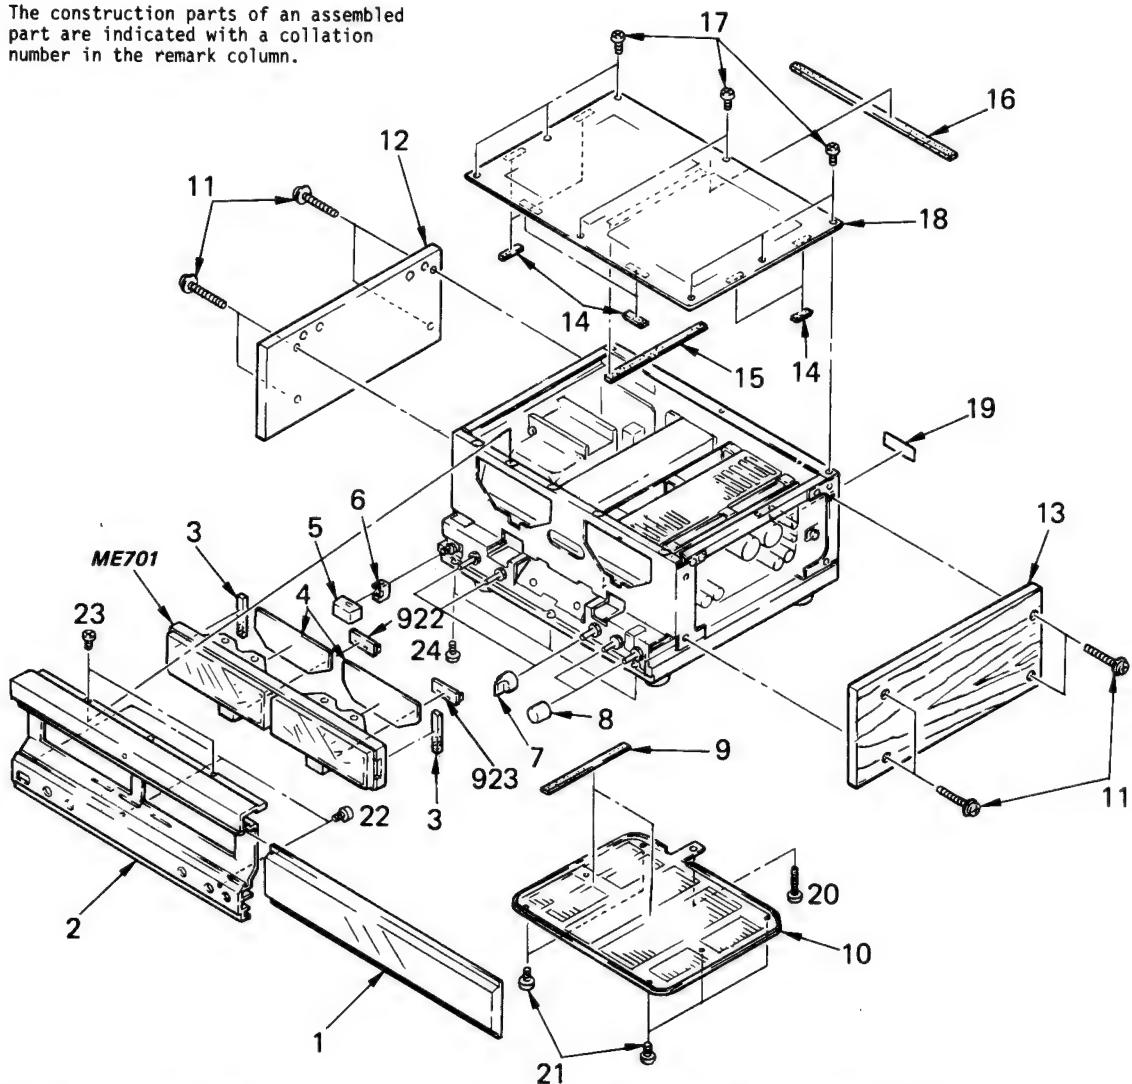

NOTE:

- The mechanical parts with no reference number in the exploded views are not supplied.
- Items marked "★" are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.
- The construction parts of an assembled part are indicated with a collation number in the remark column.

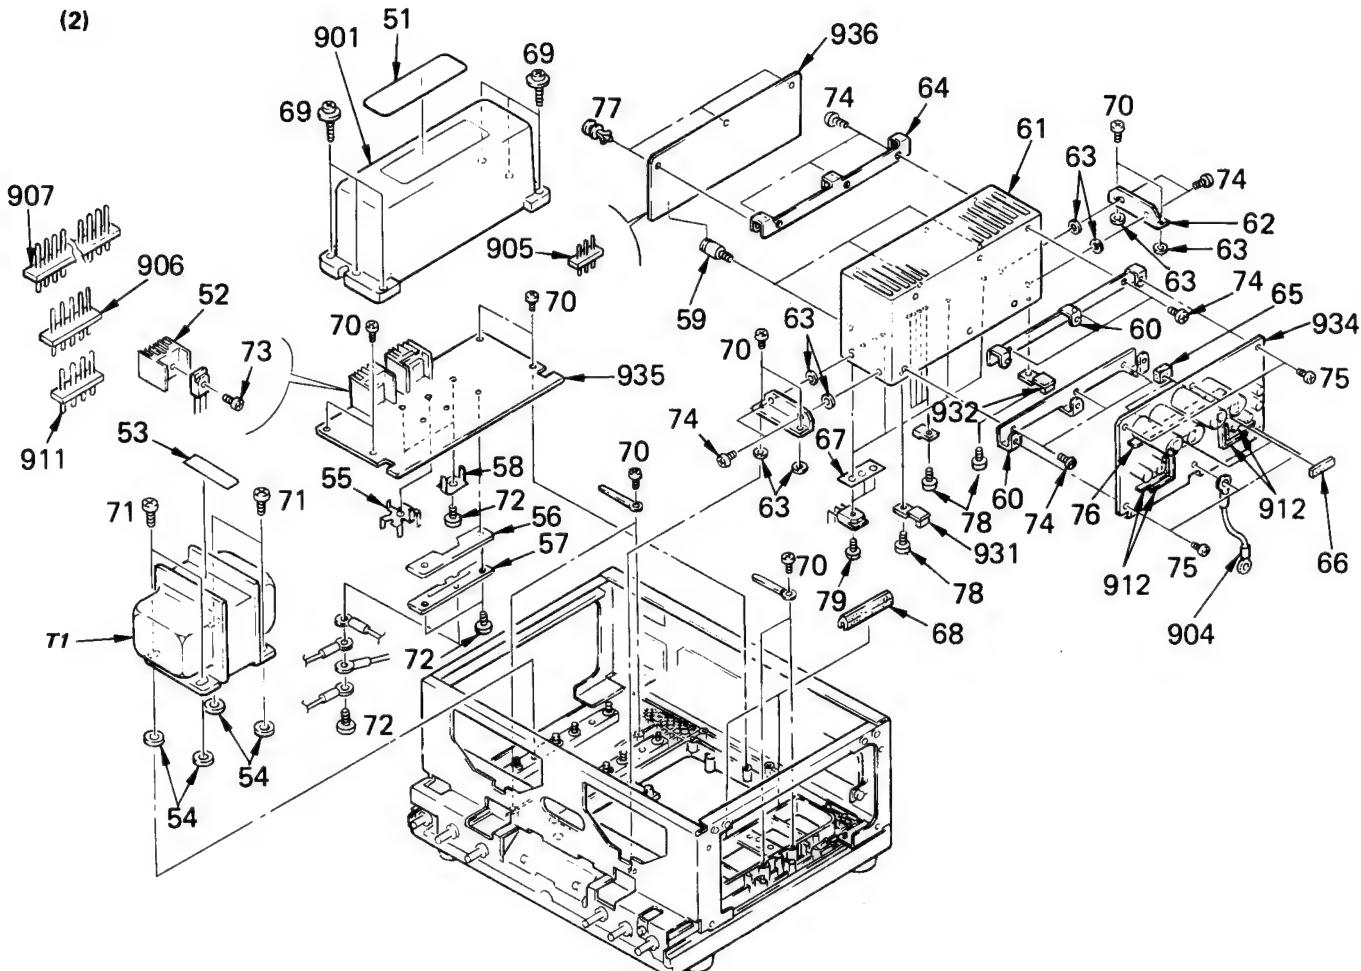

The components identified by shading and mark ▲ are critical for safety.
Replace only with part number specified.

Les composants identifiés par une trame et une marque ▲ sont critiques pour la sécurité.
Ne les remplacer que par une pièce portant le numéro spécifié.

The components identified by shading and mark A are critical for safety. Replace only with part number specified.

Les composants identifiés par une trame et une marque A sont critiques pour la sécurité. Ne les remplacer que par une pièce portant le numéro spécifié.

SECTION 5

ELECTRICAL PARTS LIST

NOTE:

- Items marked "*" are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.
- If there are two or more same circuits in a set such as a stereophonic machine, only typical circuit parts may be indicated and capacitors and resistors in other same circuits may be omitted.

CAPACITORS:
MF:μF, PF:μμF.

RESISTORS

- All resistors are in ohms.
- F : nonflammable

COILS

- MMH : mH, UH : μH

SEMICONDUCTORS

In each case, U : μ, for example:
UA... : μA..., UPA... : μPA..., UPC... : μPC,
UPD... : μPD...

The components identified by shading and mark **A** are critical for safety. Replace only with part number specified.

Les composants identifiés par une trame et une marque **A** sont critiques pour la sécurité. Ne les remplacer que par une pièce portant le numéro spécifié.

The components identified by shading and mark **A** are critical for safety. Replace only with part number specified.

Les composants identifiés par une trame et une marque **A** sont critiques pour la sécurité. Ne les remplacer que par une pièce portant le numéro spécifié.

Troubleshooting guide

Before going through the check list below, first refer back to the connection and operating procedures. Should any problem persist after you have made these checks, consult your nearest Sony dealer.

Trouble	Cause	Remedy
No audio	Faulty connection	<ul style="list-style-type: none">• Check the connections.
	Faulty setting	<ul style="list-style-type: none">• Check the setting of the SPEAKERS selector.• Check the setting of the INPUT selector.• Check the setting of the ATTENUATORS if the VARIABLE input jacks are used.
Monaural sound is heard even though a stereo program is played.	Faulty setting of the OPERATION selector	<ul style="list-style-type: none">• Set the OPERATION selector correctly. See page 6.
